

ICJP

DESCRIPTION

Audio and video devices can be connected to the system with AlsterAero's ICJP. There are two connector strips on the ICJP, with different usage.

The first row of plugs allows connecting devices to the system. Thus it becomes controllable with the different control units of the system and data can be stored on the server. With the second connector strip devices can be directly connected to an output device, like a video screen. This way complies with connecting a DVD-player to a TV, like at home.

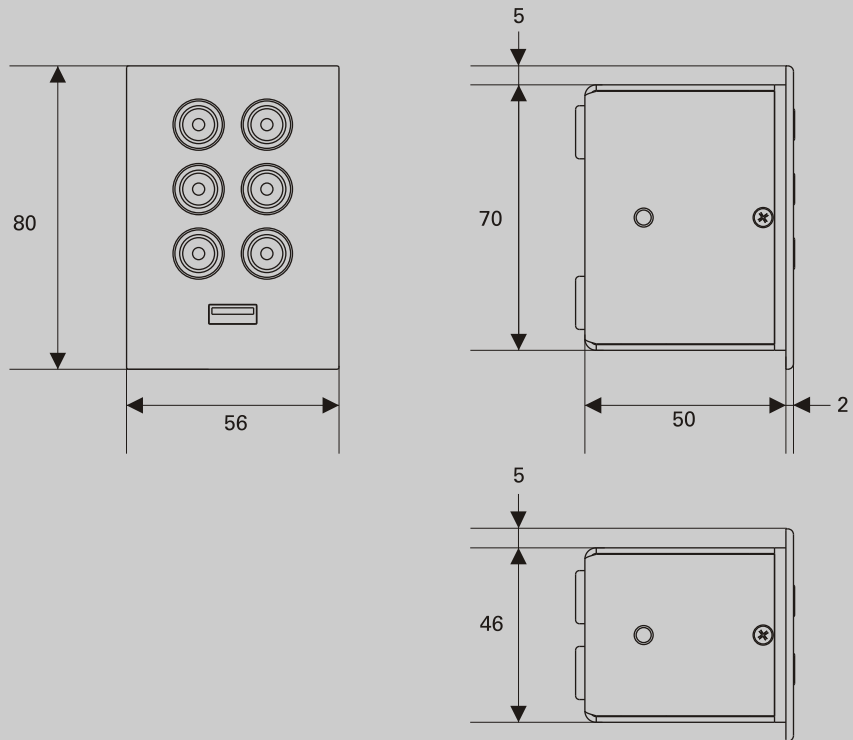

FEATURES

- easy connection of third party equipment to the system
- modus with no time delay in data transfer possible

OUTLINE DRAWING

dimensions are millimeter (mm)

QUALIFICATION

- DO160
